Professional Summary

Full-stack developer with 3+ years of experience building scalable web applications using Node.js, Express, React, and MongoDB. Adept at designing REST APIs, debugging complex issues, and collaborating with cross-functional teams to deliver high-quality software solutions.

Technical Skills

- Languages: JavaScript (ES6+), HTML, CSS
- Backend: Node.js, Express.js
- Frontend: React.js, Redux
- Database: MongoDB, MySQL
- Tools: Git, Docker, Postman
- Cloud: AWS (EC2, S3), GCP basics

Work Experience

Software Engineer — TechCorp — 2022–Present

- Designed and implemented REST APIs with Express and MongoDB.
- Integrated JWT-based authentication and role-based access control.
- Collaborated with frontend team to build reusable React components.

Junior Developer — WebSolutions — 2020–2022

- Developed e-commerce features including cart, checkout, and payment gateway.
- Optimized database queries, reducing response time by 30%.
- Assisted in migrating legacy systems to modern JavaScript frameworks.

Projects

- **E-Commerce Platform:** Built a MERN stack application with secure payment integration.
- **Task Manager App:** Developed a productivity app with JWT authentication and CRUD operations.
- **Portfolio Website:** Designed and deployed a personal portfolio using React and Netlify.

Education

B.Tech in Computer Science — XYZ University — 2016–2020

- Relevant coursework: Data Structures, Algorithms, Database Management Systems, Web Development
- Final Year Project: "Smart Campus Management System" using Node.js and MongoDB
